- WORK EXPERIENCE -

7/2018 – present **Sunset Lake Camp:** Computer Programming Teacher

- Designed curriculum and taught students age 12 to 17 advanced computer programming, including video game programming skills using HTML5 Canvas and JavaScript, teaching real and practical methods to develop software.
- Taught international students how to use an English keyboard, general computer knowledge, and writing code!

2016 – present **Freelancing**

- Worked for clients in front-end web development, creating web software and fixing issues in existing software.
- Worked as a personal educator, teaching clients basics of web programming, front-end and back-end, as well as the basics of Linux.

1/2016 – 11/2017 **MineHacker.org:** Creator, marketer

- Designed, developed, and marketed a gaming client program with over 3,000 users, used for exploiting weaknesses in gaming servers. Archive site: minehacker.herokuapp.com.

- ACHIEVEMENTS -

3/2018 **Self-made operating system**

- Created *Brooks*, a fork of Debian, used to make Linux easier and more user friendly.

7/2014 – present **GitHub.com:** Contributor

- My GitHub profile can be found at <http://github.com/bowwow15>, displaying projects I've made and contributed to.
- Created *Pixel Trek*, an online multi-player battle royale game.
